**Potential Health Effects (Acute and Chronic):**

**Inhalation:**
Exposure to high vapor concentrations may produce headache, giddiness, vertigo and anesthetic stupor.

**Skin Contact:**
Prolonged and repeated liquid contact an cause defatting and drying of the skin and can lead to irritation and/or dermatitis.

**Eye Contact:**
Produces little or no irritation on direct contact with the eye.

**Ingestion:**
Ingestion may result in nausea, vomiting, diarrhea and restlessness. Aspiration (inadvertent suction) of liquid into the lungs must be avoided as even small quantities in the lungs can produce chemical pneumonitis, pulmonary edema/hemorrhage and even death.

**Medical Conditions Generally Aggravated By Exposure:**
Pre-existing skin conditions and respiratory disorders may be aggravated by exposures to components of this product.

4. First Aid Measures

Emergency and First Aid Procedures:

In Case of Inhalation: Move person to fresh air. If breathing is difficult, administer oxygen. If not breathing or if no heartbeat, give artificial respiration or cardiopulmonary resuscitation (CPR). Immediately call a physician. If symptoms or irritation occur with any exposure, call a physician.

In Case of Skin Contact: Wash with soap and large amounts of water. Remove contaminated clothing.

In Case of Eye Contact: Flush eyes with large amounts of tepid water for at least 15 minutes.

In Case of Ingestion: Do not induce vomiting and do not give liquids. Immediately call a physician.

Signs and Symptoms Of Exposure: Exposure to high concentrations may produce headache, giddiness, vertigo, and anesthetic stupor.

5. Fire Fighting Measures

Flash Pt: 147.00 F (63.9 C)  Method Used: Pensky-Marten Closed Cup
Explosive Limits: LEL: No data.  UEL: No data.
Autoignition Pt: No data.
Suitable Extinguishing Media: Dry chemical, water fog, CO2 or foam.

Fire Fighting Instructions: Use NIOSH/MSHA approved positive pressure self-contained breathing apparatus when any material is involved in a fire.

Flammable Properties and Hazards: Avoid using straight water streams. Water spray and foam (AFFF/ATC) must be applied carefully to avoid frothing and spray from as far a distance as possible. Avoid excessive water spray application. Keep surrounding are cool with water spray from a distance and prevent further ignition of combustible material. Keep run-off out of sewers and water sources.

This product has been determined to be a combustible liquid per the OSHA Hazard Communication Standard and should be handled accordingly. For additional fire related information, see NFPA 30 or the North American Emergency Response Guide 128.

6. Accidental Release Measures

Steps To Be Taken In Case Material Is Released Or Spilled:

Keep public away. Isolate and evacuate area. Shut off source if safe to do so. Eliminate all ignition sources. Advise authorities and National Response Center if substance has entered a watercourse or sewer. Notify local health and pollution control agencies, if appropriate. Contain liquid with sand or soil. Recover and return free product to proper containers. Use suitable absorbent materials such as vermiculite, sand, or clay to clean up residual liquids.
7. Handling and Storage

Precautions To Be Taken in Handling: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Use personal protective equipment as required. Keep out of the reach of children.

Precautions To Be Taken in Storing: Store locked up.

8. Exposure Controls/Personal Protection

Respiratory Equipment (Specify Type): Use approved organic vapor chemical cartridge or supplied air respirators when material produces vapors that exceed permissible limits or excessive vapors are generated. Observe respirator protection factor criteria cited in ANSI Z88.2. Self-contained breathing apparatus should be used for fire fighting.

Eye Protection: No special eye protection is normally required. Where splashing is possible, wear safety glasses with side shields.

Protective Gloves: Neoprene, nitrile, polyvinyl alcohol (PVA), polyvinyl chloride and polyurethane gloves to prevent skin contact.

Other Protective Clothing: No data available.

Engineering Controls (Ventilation etc.): Local or general exhaust required when using at elevated temperatures that generate vapors or mists.

Work/Hygienic/Maintenance Practices: No special protective clothing is normally required. Select protective clotting depending on industrial operations. Use Mechanical ventilation equipment that is explosion-proof.

9. Physical and Chemical Properties

Physical States: [ ] Gas [ X ] Liquid [ ] Solid
Appearance and Odor: Clear, red liquid with petroleum odor.
Melting Point: NE
Boiling Point: 360.00 °F (182.2 °C) - 550.00 °F (287.8 °C)
Autoignition Pt: No data.
Flash Pt: 147.00 °F (63.9 °C) Method Used: Pensky-Marten Closed Cup
Explosive Limits: LEL: No data. UEL: No data.
Specific Gravity (Water = 1): .727 - .859
Density: 6.06 - 7.16 LB/GA at 70.0 °F (21.1 °C)
Vapor Pressure (vs. Air or mm Hg): No data.
Vapor Density (vs. Air = 1): No data.
Evaporation Rate: No data.
Solubility in Water: Negligible
Percent Volatile: 10.0 % by volume.

10. Stability and Reactivity

Stability: Unstable [ ] Stable [ X ]
Conditions To Avoid - Instability: This material is stable at 70 F, 760 mm pressure.
Incompatibility - Materials To Avoid:
Strong oxidizers such as nitrates, perchlorates, chlorine, fluorine.

11. Toxicological Information

Toxicological Information: Lifetime skin painting studies in animals with similar distillate fuels have produced weak to moderate carcinogenic activity following prolonged and repeated exposure. Similar middle distillates, when tested at nonirritating dose levels, did not show any significant carcinogenic activity indicating that this tumorigenic response is likely related to chronic irritation and not to dose. Repeated dermal application has produced severe irritation and systemic toxicity in subacute toxicity studies. Some components of this product, have been shown to produce a species specific, sex hormonal dependent kidney lesion in male rats from repeated oral or inhalation exposure. Subsequent research has shown that the kidney damage develops via the formation of a alpha-2u-globulin, a mechanism unique to the male rat. Humans do not form alpha-2u-globulin, therefore, the kidney effects resulting from this mechanism are not relevant in humans. Some components of this product were found to be positive in a few mutagenicity tests while negative in the majority of others. The exact relationship between these results and human health is not known.

Summary of health effect data on distillate fuel components:

This products sub-components may contain >.01% naphthalene. Exposure to naphthalene at 30 pm for two years caused lung tumors in female mice. Male mice with the same exposure did not develop tumors. Exposure to 10-60 ppm naphthalene for 2 years caused tumors in the tissue lining of the nose and respiratory tract in male and female rats. Oral administration of 133-267 mg/kg/day of naphthalene in mice for up to 90 days did not produce mortality, systemic toxicity, adversely affect organ or body weight or produce changes in blood. Repeated oral administration of naphthalene produced anemia in dogs. Repeated intraperitoneal doses of naphthalene produced lung damage in mice. Repeated high doses of naphthalene has caused the formation of cataracts and retinotoxcity in the eyes of rats and rabbits due to accumulation of 1,2-naphthoquinone, a toxic metabolite. Effects in human eyes is uncertain and not well documented. Pregnant rats administered intraperitoneal doses of naphthalene during gestation gave birth to offspring that had delayed heart and bone development. Pregnant mice given near lethal doses of naphthalene showed no significant maternal toxicity and a reduction in the number of pups per litter, but no gross abnormalities in offspring. Suppressed spermiogenesis and progeny development have been reported in mice, rats and guinea pigs after exposure to...
Motor Flush 15 oz., 30 oz.

high concentrations of naphthalene in their drinking water. Certain groups or individuals, i.e., infants, Semites, Arabs, Asians and Blacks, with a certain blood enzyme deficiency (glucose-6-phosphate dehydrogenase) are particularly susceptible to hemolytic agents and can rapidly develop hemolytic anemia and systemic poisoning from ingestion or inhalation of naphthalene.

CAS# 68476-30-2:
Other Studies:, TDLo, Skin, Species: Rabbit, 100.0 ML/KG, 12 D.
Results:
Skin and Appendages: Skin: After systemic exposure: Dermatitis, irritative.
Nutritional and Gross Metabolic: Weight loss or decreased weight gain.
Related to Chronic Data - death.

Acute toxicity, LD50, Oral, Rat, 12.00 GM/KG.
Results:
Behavioral: Somnolence (general depressed activity).
- Advances in Modern Environmental Toxicology., Senate Press, Inc., P.O. Box 252, Princeton Junction, NJ 08550, Vol/p/yr: 6,1, 1984

Acute toxicity, LD (Lethal dose), Skin, Species: Rabbit, 5.000 GM/KG.
Results:
Behavioral: Tremor.
Behavioral: Convulsions or effect on seizure threshold.
- Advances in Modern Environmental Toxicology., Senate Press, Inc., P.O. Box 252, Princeton Junction, NJ 08550, Vol/p/yr: 6,1, 1984

Tumorigenic Effects:, TDLo, Skin, Mouse, 243.0 GM/KG, 97 W.
Results:
Tumorigenic: Carcinogenic by RTECS criteria.
Skin and Appendages: Other: Tumors.

Standard Draize Test, Skin, Species: Rabbit, 500.0 MG, 24 H, Moderate.
Results:
Brain and Coverings: Changes in surface EEG.

Standard Draize Test, Eyes, Species: Rabbit, 100.0 MG, 30 S, Mild.
Results:
Behavioral: Somnolence (general depressed activity).

MIRS MSDS, (c) A V Systems, Inc.
GHS format
12. Ecological Information

General Ecological Information: Product can cause fouling of shoreline and may be harmful to aquatic life in low concentrations. The 96 hour LL50 values for an accommodated fraction (WAF) of fuel oil ranged from 3.2 to 65 mg/l in fish and 2-210 mg/l in invertebrates. EL 50 values for inhibition of algal growth ranged from 1.8 to 2.9 mg/l for No. 2 fuel oil and from 10 to 78 mg/l for diesel fuel. This product does not concentrate or accumulate in the food chain. If released to soil and water, this product is expected to biodegrade under both aerobic and anaerobic conditions.

Environmental Hazards: TOXIC TO AQUATIC ORGANISMS. MAY CAUSE LONG-TERM ADVERSE EFFECTS IN THE AQUATIC ENVIRONMENT.

Environmental Fate: THIS PRODUCT CONTAINS COMPONENTS WHICH MAY BE PERSISTENT IN THE ENVIRONMENT.

13. Disposal Considerations

Waste Disposal Method: Disposal should be made in accordance with federal, state and local regulations.

14. Transport Information

LAND TRANSPORT (US DOT):

DOT Proper Shipping Name: FLAMMABLE LIQUID, NOS (Fuel Oil No. 2) ()
DOT Hazard Class: 3 FLAMMABLE LIQUID
UN/NA Number: UN1993 Packing Group: III

LAND TRANSPORT (European ADR/RID):

ADR/RID Shipping Name: FLAMMABLE LIQUID, NOS (Fuel Oil No. 2)
UN Number: 1993 Packing Group: III
Hazard Class: 3 - FLAMMABLE LIQUID ADR Classification: 3

MARINE TRANSPORT (IMDG/IMO):

IMDG/IMO Shipping Name: FLAMMABLE LIQUID, NOS (Fuel Oil No. 2)
UN Number: 1993 Packing Group: III
Hazard Class: 3 - FLAMMABLE LIQUID IMDG Classification: 3 Marine Pollutant: No

AIR TRANSPORT (ICAO/IATA):

ICAO/IATA Shipping Name: FLAMMABLE LIQUID, NOS (Fuel Oil No. 2)
UN Number: 1993 Packing Group: III
Hazard Class: 3 - FLAMMABLE LIQUID IATA Classification: 3
